

WOOD WORKERS HAMMER

Does not dent or mark wood!

The 34oz. Dead Blow hammer is cut from a special resistant urethane, which allows this hammers rectangular face to be struck hard against both finished and unfinished wood surfaces. This hammer can be used during assembly on wood projects without causing damage to the surfaces, profiles or finishes. Dead blow performance means work pieces that are struck together stay together.

The 34oz is the perfect weight for most jobs around the wood craftsman shop.
